

FIMMDA-THOMSON REUTERS-MUMBAI INTER-BANK FORWARD OFFERED RATE
EXPLANATION:

Mumbai Inter-bank Forward Offered Rates are annualized premium levels for one, two, three, six and 12 months maturities polled between 1200-1210 IST everyday. Dollar-rupee swaps reference – premia levels sourced from 17 institutions after removing the layers (high and low). These levels are available on page <INSWAP01>. These rates are then added to the USD LIBOR interest rates.

Spot dollar/rupee rate – Reserve Bank of India's reference rate from Thomson Reuter's page <RBIB> for the same day.

FORMULA USED FOR CALCULATION OF MIFOR:

$$\text{MIFOR} = ((1 + \text{LIBOR} * \text{No of days} / 36000) * (1 + \text{USD/INR annualized forwards (in \%)} * \text{No of days} / 36500) - 1) * 36500 / \text{No of days}$$
